

## **Development of the Integrated Plan**

Every five (5) years, SFPDPH is charged with the development of an Integrated Plan in cooperation with the San Francisco HIV Community Planning Council. The timing and content of the Integrated Plan is subject to HRSA and CDC guidelines with respect to general content and timing of submission.

To facilitate this process, SFPDPH and the Planning Council will convene a Work Group that includes council members and other stakeholders to be established for the purpose of developing an Integrated Plan. The draft plan will be reviewed by the Work Group and the Steering Committee, and then referred to the full Council; the approved plan is reviewed and monitored by the Council Affairs Committee.
