# HRSA SERVICE CATEGORIES – WHAT ARE THEY?

2

- Service category definitions dictate what are allowable uses of funding under the **Ryan White CARE Act**.
- Part of the Planning Council's role is to **prioritize** and **allocate** funding for each **service category**.
- The **Health Resources & Services Administration (HRSA)** develops general service categories. The local Planning Council has further defined local service categories. For example, HRSA has one housing category, the SF EMA has five.

# HRSA SERVICE CATEGORIES – WHAT ARE THEY?

3

- HRSA requires **75% of funding** for services be allocated to **Core Services**. The SF EMA (like most jurisdictions post-Affordable Care Act) has successfully applied for a waiver the past four years.
- Differentiated definitions of service categories and standards of care are **developed by grantee** and **reviewed by the Planning Council**
- It is the **responsibility of the grantee** to ensure that service standards of care are in place for larger funded service categories.
- Definitions of service/categories standards are included with **Request for Proposals** when service categories are competitively bid.

# HRSA SERVICE CATEGORIES – WHAT ARE THEY?

4

- Their purpose is to **define for all providers** who offer the **same components** of a given service category across the **eligible metropolitan area**.
- **Overlap in some elements exist between categories** (e.g. completion of psychosocial assessments in both Medical case management and Non-medical case management)
